Flutter Developer

Experienced Flutter Developer with 3+ years of experience in developing production level Flutter Mobile Apps. I have experience developing mobile applications for both Android and iOS platforms using various technologies as backend. I am eager to continue learning and staying up-to-date with the latest industry trends and advancements, so I can create innovative solutions for complex problems. I am passionate about full stack flutter development and excited to join a leading or emerging company/team.

EDUCATION

Bachelor's degree in Computer Software Engineering

University of Gujrat • Sep 2019 – Aug 2023

SKILLS

- Flutter, Firebase, Provider, Getx, Git, Figma to Flutter, Dart, Admob, Deep Linking, Payments API's, MVVM & MVC

TOOLS & TECH

- Firebase, Git & GitHub, Rest API's, Android Studio, Play Console, Third party SDK's, Figma to Flutter

WORK EXPERIENCE

Shaudan Private Limited • Gujrat District, Punjab, Pakistan • Hybrid • Apr 2022 - Oct 2023

Flutter Developer

- As a Full stack mobile app developer, I developed a B2B e-commerce mobile app with an admin panel from scratch using Flutter and Firebase along.
- Worked with Shaudan for App development and as a Database Consultant and Product Advisor.

Webrange Solutions • Islamabad, Pakistan • Remote • Oct 2023 - Present Flutter Developer

- At Webrange Solutions, I am working as a senior Flutter developer, focusing on the development of cross-platform mobile applications.
- My responsibilities included designing and implementing complex UI/UX widgets, optimizing app performance, and integrating various APIs and backend services. Additionally, I collaborated closely with the team to ensure high-quality code and seamless app functionality.

University of Gujrat • Gujrat, Punjab, Pakistan • On-site • Oct 2022 - Apr 2023

Android Developer

- Worked on native android project for final submission. Worked with Apis, intents and services in Java Native.

PROJECTS

Shaudan Mobile App • Nov 2022 - Aug 2023

A B2B marketplace for wholesalers & retailers. The wholesalers can manage stores, listings, products, profile, orders and order tracking. The retailers can manage their profile, place orders, view stores, wholesalers, listings and track orders, can buy on credit & much more.

Available on play store: <https://play.google.com/store/apps/details?id=com.marketplace.shaudan>

Tazwedco – Ecommerce App • January 2024 - February 2024

Freelance

Tazwedco leveraging Firebase for backend operations, designed to streamline wholesale transactions between wholesalers and companies. With a user-friendly interface, wholesalers can browse, add products to a cart, and place orders securely using Stripe payment integration. The app also features real-time order tracking and a review system.

Available on App Store: <https://apps.apple.com/pk/app/tazwedco/id6479000822>

Affiliate Chat Box • December 2023 - January 2024

Freelance

Implemented real-time chat functionality coupled with push notifications, facilitating seamless communication and timely updates for affiliates and merchants, fostering collaboration and business opportunities. Facilitated connections between affiliates and merchants, providing a platform to explore and share potential business opportunities. Utilized REST APIs for seamless data communication and interaction.

Available on Play Store: <https://play.google.com/store/apps/details?id=com.project.ond>

Neighbstor – Service Provider App • September 2023 - February 2024

Freelance

A location-based service provider platform, facilitating users to request services within a 3000-meter radius of their current location. Firebase is serving as backend. App holds functionality of chat, notification services, stripe payment, profile management and much more.

Neurobridge – Autism App • April 2024 - April 2024

Freelance

This app is designed to support individuals with autism. The app features educational lessons and quizzes that users can take after completing the lessons to reinforce their learning. Additionally, Neurobridge allows users to track the progress of their exercises, providing a comprehensive tool to assist with their development and growth.

Pilgrimage • February 2024 - March 2024

Freelance

Developed a comprehensive app aiding Hajj pilgrim with hotel views in Makkah and Madinah, as well as navigation to gates and important landmarks. Integrated solo and group chat functions, alongside internationalization and localization features for a seamless global user experience.

Rider App – Uber clone • June 2022 - January 2023

Implemented real-time Geolocation tracking and mapping to provide precise and efficient driver and passenger matching. Developed a review and rating system for drivers and passengers to enhance trust and accountability within the platform.

Face Emotion Detection • December 2022 - March 2023

App utilized the MobileNet model to classify the emotions based on the training Data Set. App suggests some psychiatrists near the location of the user in case of depression.
